VT No.	Type
11-0350	Hydraulic
11-0356	Solid

S&S Limited Travel Spacer Kit for Hydraulic Tappets. Designed to maximize the efficiency of the stock hydraulic tappets. Kit consists of four (4) machined heat treated and ground spacers when installed in the tappets. They reduce the travel of the hydraulic unit in high RPM situations thereby eliminating potential damage to the engine due to high RPM valve float. Under normal conditions they allow the tappets to operate as designed resulting in low valve train maintenance and minimal noise. VT No. 10-8532

Comp Cams "Build Your Own" Stroker Pushrod Kits are designed for stroker motors with tall cylinders. Feature 7/16" diameter tubing in either .049 wall thickness with press-in ends on .080 wall thickness with screw in ends.
