Taper Lite Adjustable Pushrods for 1966-84 are manufactured from 4130 steel with hardened adjusters and ball ends. Designed to be installed without removing gas tank, rocker box or camshaft cover. Set of four. Use with stock hydraulic lifters
VT No. 11-9704

Solid Pushrod Conversion fits 1966-84 Shovelheads. We put the adjuster into the lifter body to increase the stability of the pushrod at greater angles. A tapered split lock nut is used for the best way to lock the adjusting bolt into the lifter body. We use a 5/16-32 extra fine thread for easier and close adjustments. Pushrods are long enough to accommodate engines with stroker cylinders. Alloy pushrods have hardened steel tips.

VT No. 11-9535

Solid Tappet Kits for 1966-84 Shovelhead are made from aircraft quality 4130 seamless chromoly tubing. Extremely rigid, resists flexing even when used with radical cams and high spring rates. Lighter than stock pushrods. Lengths are as long as possible for added rigidity of adjuster. Each set includes 4 pushrods and 4 adjustable solid lifter adapters. Smaller diameter than most moly pushrod sets for clearance in pushrod cover tubes. Instructions included. Fits stock or .200 longer stroker cylinders.

VT No. 11-9545

Replacement Nuts fit each brand of pushrods or tappets.
